

Hikvision AI Open Platform

Accelerating Diversified and Customized AI Applications

What is Hikvision AI Open Platform?

Hikvision AI Open Platform was developed to solve real-world challenges across diverse vertical markets and to meet a variety of specific user needs. The platform provides a warehouse of algorithm models for end users to train their own AI algorithms by inputting sample images. Users can then load these models onto varied forms of Hikvision products. This platform also features privatized deployment, low learning costs, a friendly user interface, and accelerated algorithm application, allowing end users to customize AI algorithms suited to their own needs and scenarios while keeping their data privacy well protected.

Why should you use Hikvision AI Open Platform?

Simplified Data Management

- Intelligent data labeling
- Visual operating interface

Model-based Training

- AutoML methods & processes
- Low technical threshold

Easy Algorithm Deployment

- Abundant hardware options
- Managed application platform

High Adaptability & Scalability

- Iterative optimization
- Multiple integration interfaces

Inclusive Algorithm Ecosystems

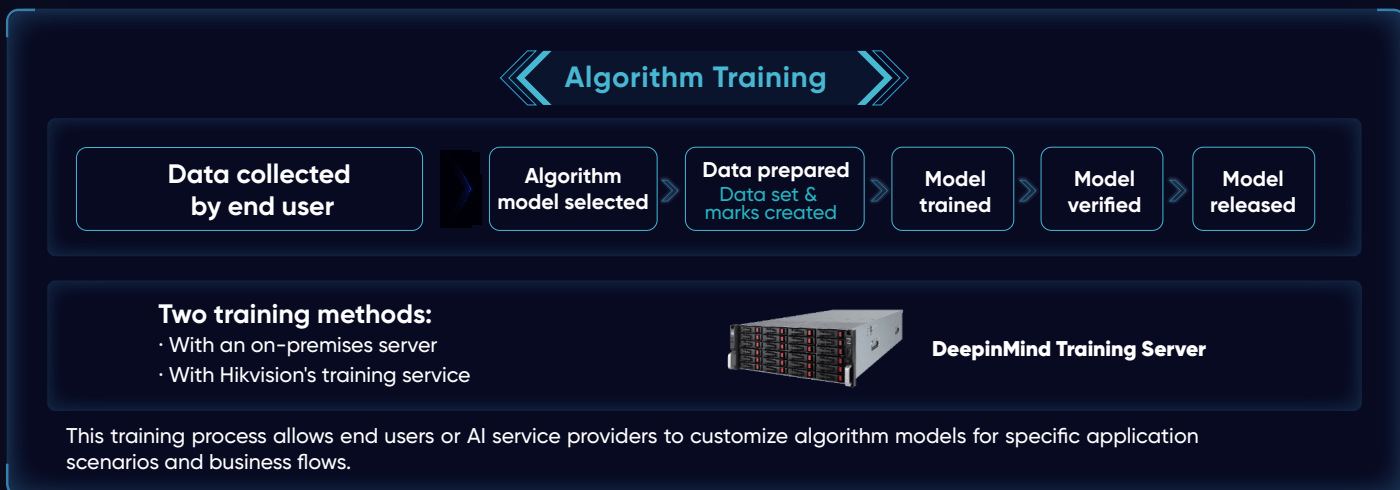

Connecting professional AI service providers and end users with an array of unique application needs

Plentiful Algorithm Models for a Wide Variety of Applications

 Object Detection Model	 Attribute Classification Model	 Operational Security	 Food Traceability	 Defect Recognition
 Mixed Model	 Text Recognition Model	 Equipment Inspection	 Safe Production	 Obstacle Avoidance
