

HOW TO

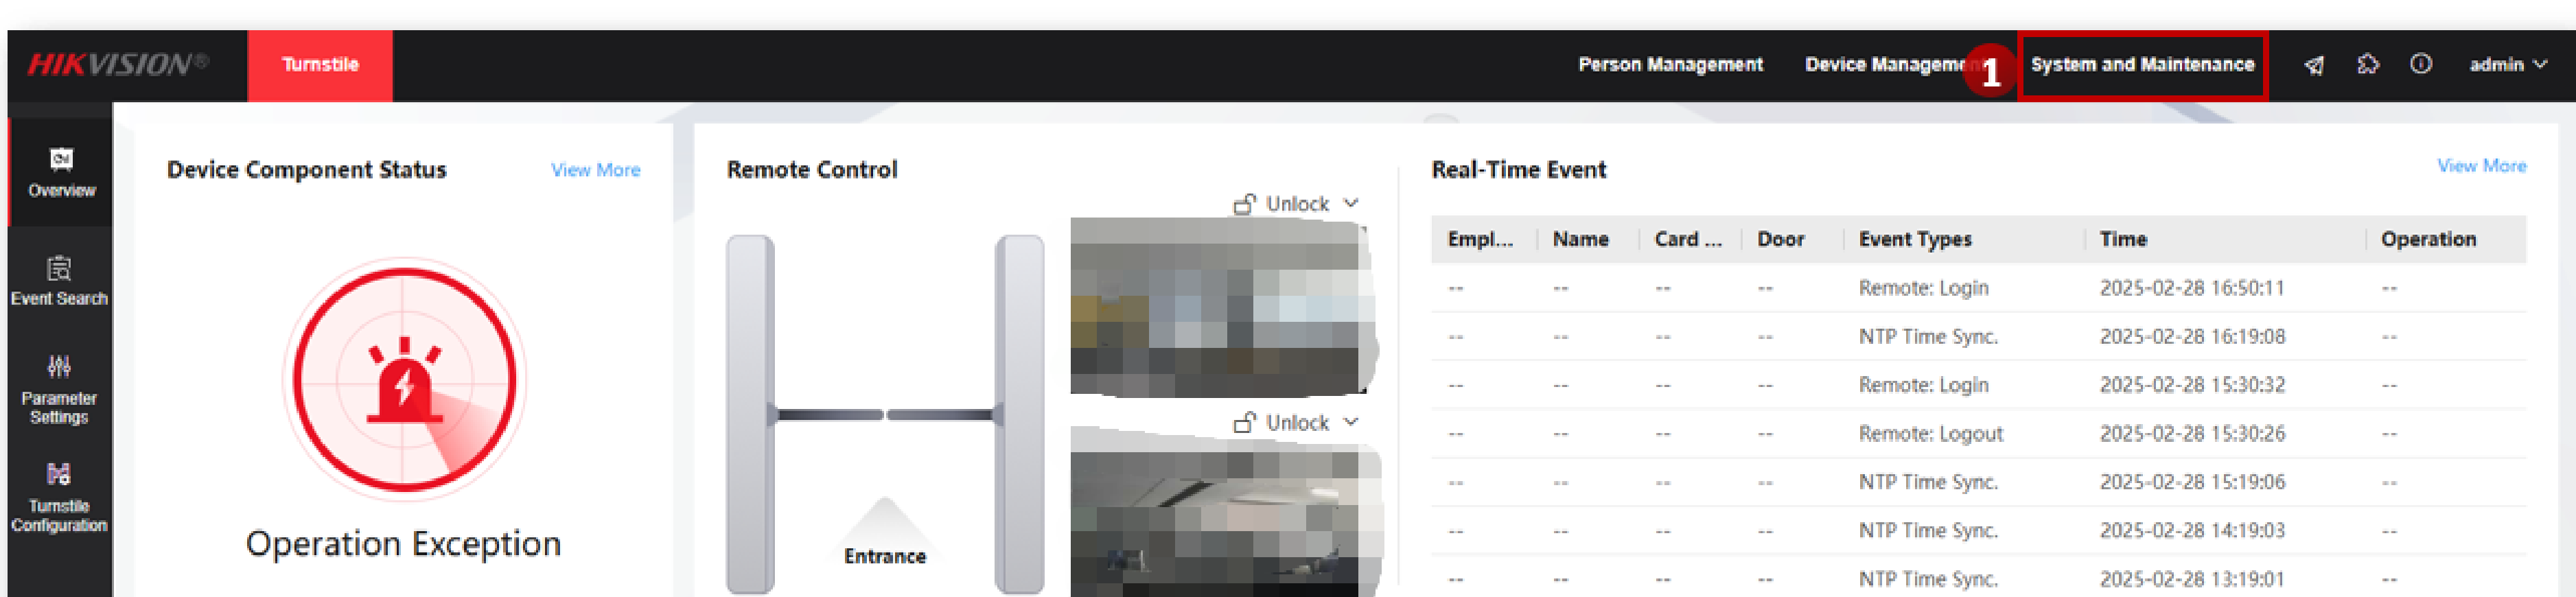

Set Custom Audio Prompt of Turnstile

On Turnstile device, you can set custom audio for the prompt message. Here we take the DS-K3M220-B961TX as an example to show how to set.

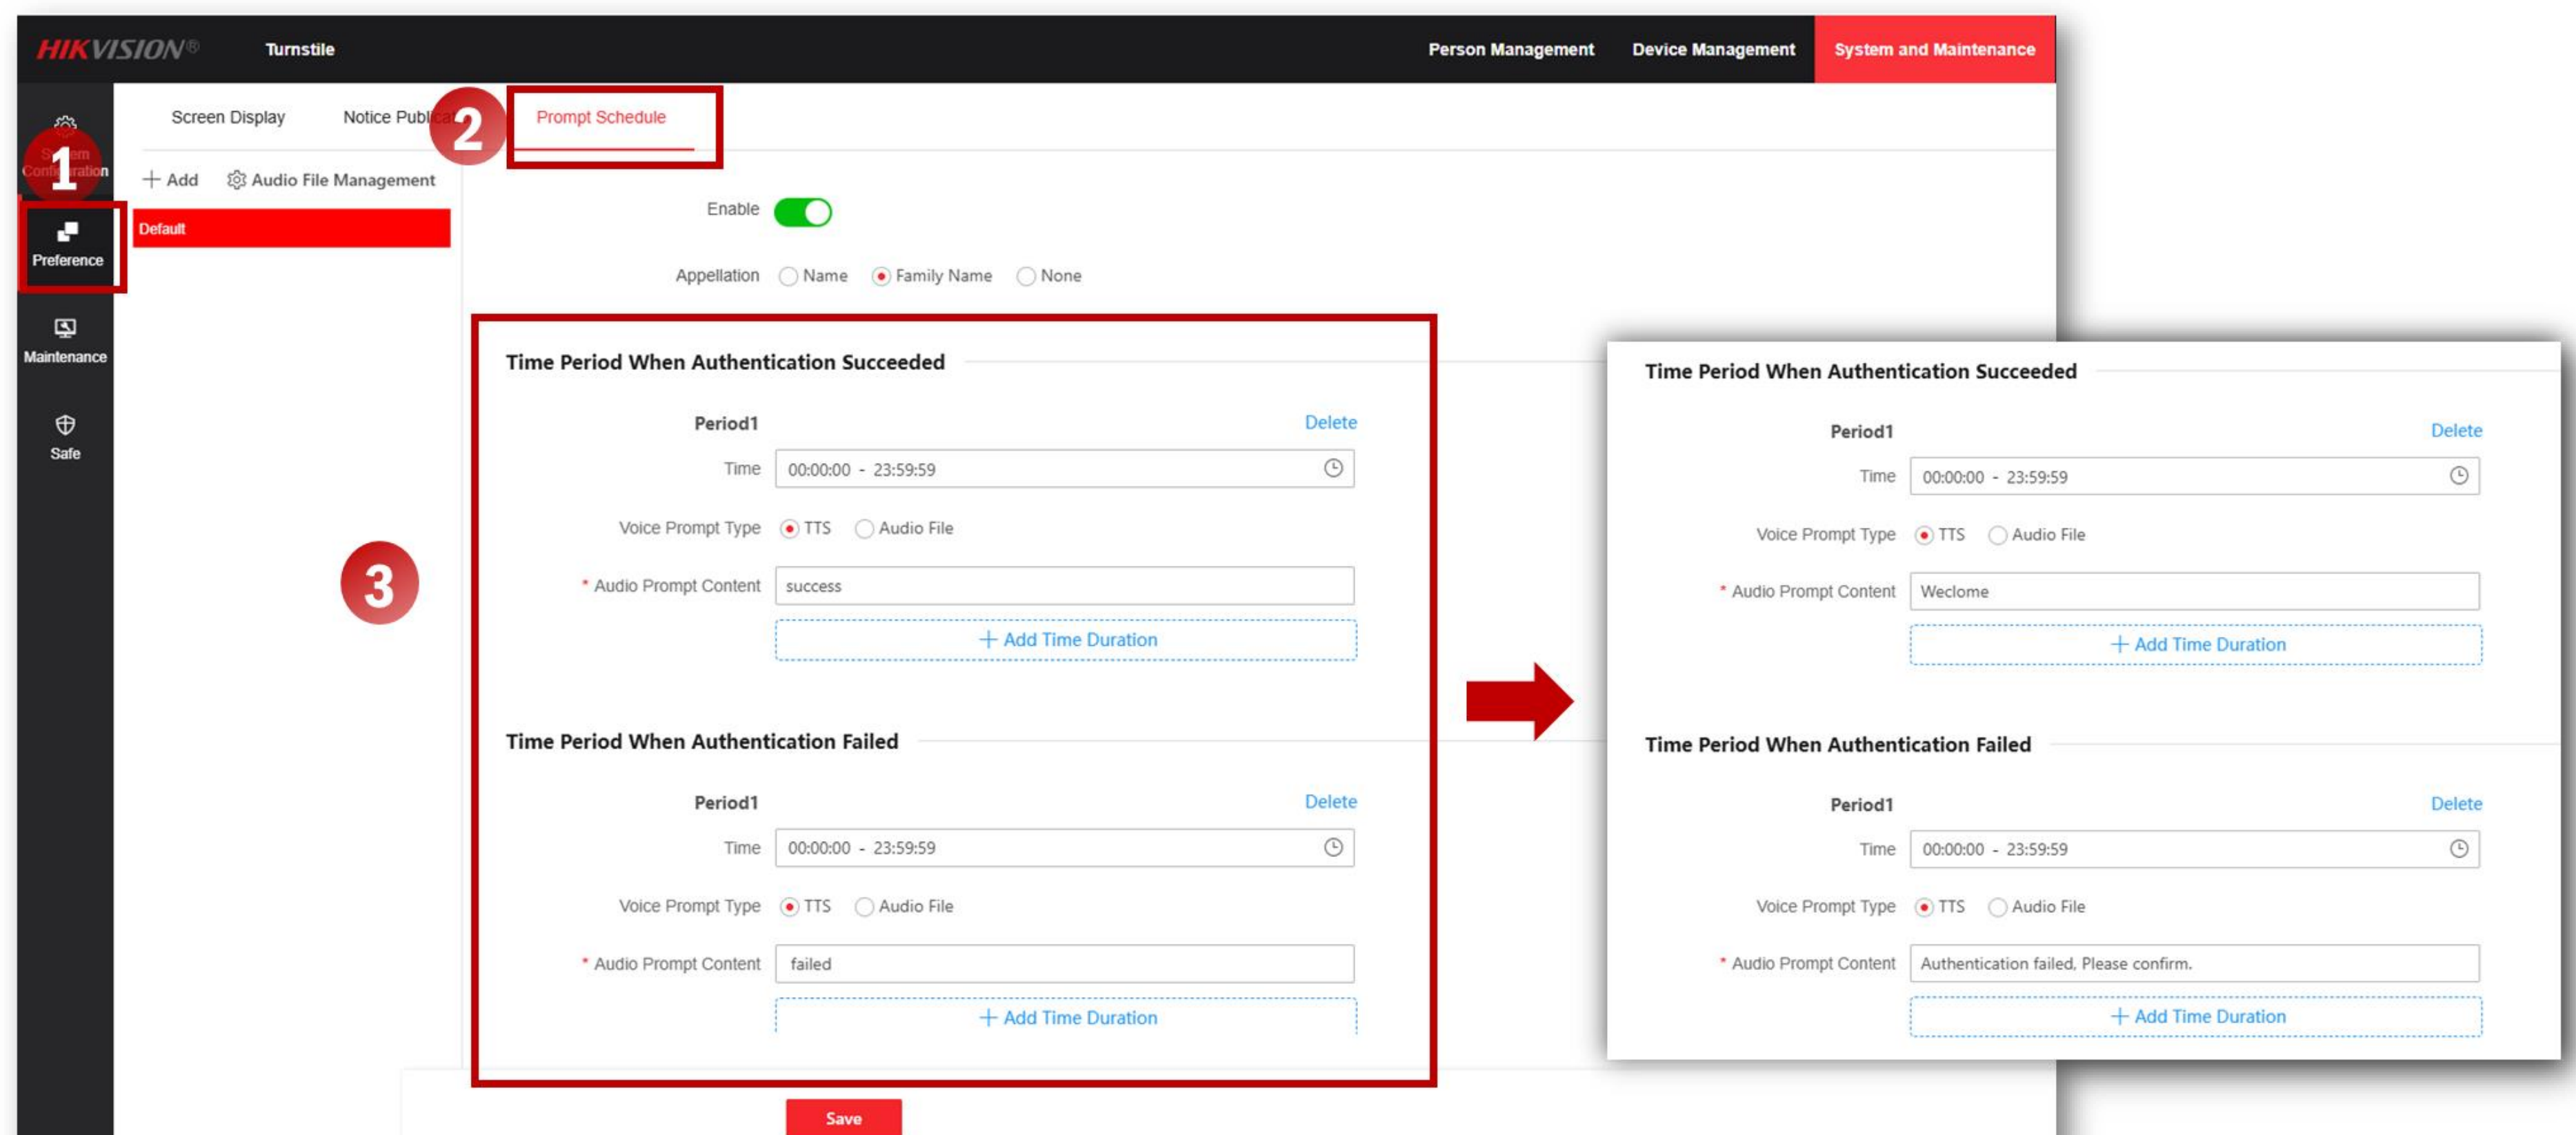

TTS or customized Audio prompt setting

Login the device on web browser, click **System and Maintenance** on Home page.

Click **Preference > Prompt Schedule**.

1. TTS: TTS means text to speech, click **Enable > configure** (Time, Video Prompt file Type as **TTS and input Audio Prompt Content**) of Time Period when Authentication Succeeded and Time Period When Authentication Failed.

2. Audio File

- Click **Audio File Management > Add > File folder** button to **upload customized audio file**. *Notes: The audio file format should be wav, mp3, and the size should be less than 512KB.*
- Configure (Time, Video Prompt file Type as **Audio File and choose customized audio file**) of Time Period when Authentication Succeeded and Time Period When Authentication Failed.
